

specialists in flexible packaging

## KM Packaging Services Ltd – Profile

**KM Packaging Services Ltd** is a specialist provider of heat sealable lidding films used on a wide range of premade food trays, tubs and pots for ambient, frozen or chilled prepared convenience foods. The films are designed to excel in presenting, protecting, and in some cases extending the shelf life of prepared food.

KM Packaging serves customers from small food companies to major corporates across the United States, Canada, UK, Europe and as far afield as Australia and New Zealand. The company's year on year success is largely attributable to unrivalled technical understanding of the capabilities of its products and the interface between packing machine, tray and lidding film.

### A Local Supplier, Wherever You Are in the World

An understanding of global food contact legislation ensures the correct films are chosen to comply with local laws – another factor that demonstrates KM's commitment to ensuring that its customers have the same purchasing experience as if they were using a local supplier, no matter where they are in the world.

The company first made its mark with the development of revolutionary film technology for sealing foil trays and has continued to invest in emerging new solutions, spearheading major breakthroughs including:

- Significantly extended shelf life for ambient ready meals containing a combination of meat, vegetables and sauces
- Triple-compartment tray providing different packaging atmospheres for fresh ingredients including protein, vegetables and carbohydrate
- A pre-prepared, straight to oven slow-cook casserole range combining raw meat, fresh chunky vegetables and rich gravy in a single container
- Unprecedented rapid turnaround on development projects for clients worldwide
- Superguard X range, a selection of strong, high barrier films suitable for a wide range of applications
- Our new line of "Klarity" films provides unsurpassed product visibility for foil trays

### Flexibility and Minimal Lead Times

As a business KM Packaging puts extraordinary effort into its procurement, manufacturing and international logistics processes to create flexibility and minimise lead times for the fast moving food market. All the products supplied by KM Packaging are manufactured under BRC IOP criteria and conform to internationally recognised standards for food-contact packaging, notably EU and US FDA directives. KM Packaging is also a member of Sedex (empowering ethical and responsible supply chains), Campden BRI (R&D for the food industry) and The Packaging and Films Association.

With an in-depth understanding of the food manufacturing processes, industry issues, legislation and consumer demands, KM Packaging is renowned for its technical expertise and broad product knowledge and often works jointly with clients to develop new, bespoke solutions to meet specialist needs.

KM Packaging, established nearly 30 years ago, is a dynamic, growing and successful business meeting the demands of food manufacturers across the world. Whether you are an independent small-scale food manufacturer or an international supplier to multiple retailers, KM can meet your requirements. [www.kmpackaging.com](http://www.kmpackaging.com)
